FAX (715) 839-4939*

## **Welcome to the Chippewa Valley!**

The purpose of this guide is to provide college students with information on opportunities that exist with area businesses. The guide contains sections on companies and what they offer including internships, part-time employment, job shadowing, and tours. Our ultimate goal is to help you develop relationships and networks that will keep you in the Chippewa Valley after you graduate. We are using the theme ***“Come for College, Stay for a Career.”***

The Chippewa Valley Employer Guide is a regional initiative designed to help stop “the brain drain” by retaining the exceptional talent that is available at the University of Wisconsin-Eau Claire, University of Wisconsin-Stout and the Chippewa Valley Technical College. The guide is sponsored by the City of Eau Claire Economic Development Division, which helps provide workforce related efforts to attract and keep quality workers in the Chippewa Valley.

The Chippewa Valley is a geographic region that is made up of communities located in Chippewa, Dunn and Eau Claire counties. It is a great place to live and work. The area is physically beautiful with rolling hills full of trees and rivers and lakes throughout. The excellent educational system, low crime rate, low cost of living, and family values make the Chippewa Valley a great place for you to consider your home!

We hope this guide will help you take advantage of the employment opportunities in the Chippewa Valley. We encourage you to join many of your friends as those who “come for college, stay for a career.”

Please call us if you have any questions regarding the guide or if we can assist you with your local employment search.

Sincerely,

**Mike Schatz, EDFP**  
**Economic Development Administrator**

## Guide Information

The purpose of this Employer Guide is to provide area students with a resource for obtaining internships, job shadowing opportunities, business tours, part-time employment, and eventually careers in the Chippewa Valley. There are a variety of opportunities available to students in the Chippewa Valley as is evident by the number of employers that participated in this guide!

While each company listed in the guide has been contacted and has provided their programs of interest, it is important to remember that there will not always be openings. Also keep in mind that this is by no means a definitive list of companies in the Chippewa Valley! As we continue to spread the word about the Employer Guide additional companies will be added.

There are several other ways to obtain internships, job shadowing opportunities, business tours, part-time employment, and careers. Contact your educational institution's Career and Co-op Services department and your professors who will be excellent links to opportunities with local businesses and industries. The Internet also holds information on resources available. No matter what method of networking and building relationships you prefer, there are plenty of options available. For your convenience, many of the areas' key contacts are listed below:

### Company Description

The Chippewa Valley has been the site for one of Nestlé USA Nutrition Division's manufacturing facilities since 1987. In 2001 Nestlé built an additional dry production facility only a few miles from the current plant. Both Nestlé plants are highly automated facilities with complex manufacturing technologies for liquid and powder packaging including aseptic, hydrolysis, and spray drying techniques. As a part of the Nutrition Division, we manufacture sensitive products including Infant, Clinical and Performance Nutrition. For more information about Nestlé and Nestlé products, visit our website at [www.nestleusa.com](http://www.nestleusa.com).

## Job Shadowing

Job shadowing allows students to connect with or “shadow” a business professional (job shadowing mentor) who has experience in a specific occupation or career. Students observe the mentor in his/her working environment and have the opportunity to ask questions about the knowledge, skills, talents, and level of education required for the job. While the purpose of job shadowing is to gather career-related information and expand networking contacts, it also provides an opportunity to build interviewing skills and see workforce technologies in action. Multiple job shadowing experiences may be arranged to allow students to explore a variety of career paths.

### **Does Job Shadowing Really Work?**

Yes! Job shadowing works because most people:

- Enjoy talking about their jobs and career fields.
- Are flattered that you ask their advice and assistance in planning your own career and future.
- Are empathetic about career transitions because they have experienced them.
- Like to help others because it makes them feel good.

### **Why Should I Participate in a Job Shadowing Program?**

A job shadowing experience will:

- Present you with up-to-date facts about an occupation that can help you in your decision-making.
- Inform you about the skills required for certain jobs, giving you the opportunity to match them with your own skills.
- Demonstrate how people feel about their work, allowing you to assess how you may feel in a similar position.
- Provide you with valuable networking contacts to utilize when you are doing your actual job search.
- Help develop your communication skills and self-confidence by talking with professional people in a more relaxed work environment.
- Expose you to occupational “buzzwords” unique to the career field of your choice.

- Give you an edge in future interviews by providing you with inside knowledge of the industry.
- Develop basic skills similar to a targeted job search, which you will be conducting later.

### **How Do I Get Started?**

Build a potential contact list or contact Career Services or your advisor for the *Chippewa Valley Area Job Shadowing Guide*. Determine who has the information you are looking for and identify people who:

- Share common interests, enthusiasm, or involvement in some activity that appeals to you.
- Work in a job setting that you are interested in.
- Work in career areas that interest you.
- Work in specific jobs or in a specific organization that interests you.

### **Once I Have My List, How Do I Find These Potential Contacts?**

- Contact the Career Services staff and inquire about the database of Chippewa Valley employers who have volunteered to be contacted by students regarding career information and opportunities.
- Use the Internet! You might even make your first contact via e-mail.
- Check the Yellow Pages of the geographical areas that interest you.

### **How Should I Contact These People?**

There are three ways to establish a job shadowing experience:

- **Direct** – Use the *Chippewa Valley Employer Guide* (CVEG) to contact employers that have indicated a willingness to participate in job shadowing opportunities. Be sure to inform the contact that you found his/her name in the CVEG!
- **Telephone** – Call the contacts listed in the CVEG. Explain that you are a student conducting career research and wish to gather information to assist in making career decisions. Your goals for the call are to connect with a potential shadowing mentor and schedule the time and date for the shadowing experience.
- **Write a letter/e-mail** – If you have the name of the potential contact you may wish to write a letter or e-mail before making the phone call. Clearly state

your purpose and desire to schedule a job shadowing experience. Indicate that you will follow up by telephone in hopes of setting a specific date and time.

### **Some Steps to Follow:**

- **What is your goal?** – The primary objective of job shadowing is to investigate a specific career field in order to make a more informed career decision.
- **Identify your potential contacts** – When you know what you want to accomplish, ask yourself, “Who has the information that I need?”
- **Arrange the job shadowing experience** – You will want to discuss this with your job-shadowing mentor. Your experience can be arranged for a half-hour, a day, or a week! It will typically start with questions related to the job or specific career field followed by observation time.

## **Internships & Co-Op's**

An internship is a short-term work experience emphasizing *learning*. In an internship, students work in an organization and observe and reflect on what happens there. Through this experience, students acquire essential practical skills through exposure to the real world of work that takes them beyond the boundaries of the classroom. An internship opportunity is a great way to enhance self-confidence and career direction!

Internships attempt to integrate formal study with practical experience. This experience is an integral part of one's education, supplementing academic preparation while promoting personal and professional development. Having an internship also greatly increases your employability ... many companies regularly hire their interns for full-time positions! As interns, students work in areas related to their fields of study and individual interests. Most internships last three to eight months and are taken for academic credit or for pay.

## **Local Opportunity Xpress Tours (LOX)**

Local Opportunity Xpress Tours are available to students and faculty at UW-Eau Claire, UW-Stout and the Chippewa Valley Technical College. This is an excellent opportunity for students to tour the region's business parks and experience first hand the facilities of potential employers. Your tour guide will provide information about each company and describe the types of jobs available. Bus tours are available, as are virtual tours that can be presented in your classroom or at your next organizational meeting. Students will walk away with a new appreciation of the employment opportunities available in the Chippewa Valley... guaranteed!

An alternative customized tour can also be arranged. These tours take place inside the businesses and allow students to meet with employees and view the departments that correspond with your particular major. For example, a student majoring in Marketing could meet with and tour the marketing departments of a company. An MIS or Computer Science major could tour the Information Technology department at a local business. This tour will provide valuable insight into the internal structures of companies and whether or not this is the type of job/company you are interested in working for in the future!

Tours are available to both student organizations and students not affiliated with any on-campus group. We can accommodate large groups, small groups, and personalized tours. To participate, contact our office or your student organization!
